To whom this concerns:I fully support satellite radio and my right to receive current traffic and weather 24 hours a day.

First of all satellite radio subscribers such as I pay several hundreds of dollars to be able to receive the broadcasts in our cars or homes and then pay a monthly subscription fee to hear those broadcasts.

I drive cross country several times a year and appreciate the fact I can hear current traffic reports as I need them. Commercial broadcast stations report traffic at the best 3 to 6 times an hour and then only for a 15 seconds or so. It actually takes an hour or more to get complete traffic reports and then the reports are usually not accurate.

Please vote to support subscription satellite radio when you vote on petition 04-160.

Respectfully,
Gary Gabrick
